

HOLE 5

Up hill (50m rise) you just need to keep it straight and get to within a hundred metres. Then pitch onto a green which has very few tricks...Did I mention straight on the drive? If you stray, the famous trees of Mount Pleasant G.C. will swallow your wayward shots and make you pay dearly. Hopefully the wind is not around as you pitch onto the green. The surround gutter at the back could also present problems if you are too long. The thick grass here can grab clubs on return.
