

HOLE 7

Decisions again at the Tee...do you try to get past the duck pond and leave yourself less than 150 to the green? Or do you stay safe and leave yourself with a long iron or fairway wood to the green? A winter breeze will certainly add difficulty, as you are hitting up the gentle slope and into westerlies or south Westerlies. And how generous is the pin placement...if a cheeky setter has placed it on the lower tier you have a very small target to hit.... a par here is good value.... a birdie is massive.
